48-core ODF wiring unit

Overview

Deploy ODU-B-48C neutral ODU-B series ODF for 48-core fiber with welding tray and optional SC/LC/FC/E2000 adapters; simplify patching and splicing. It is mainly used for cable inlet, grounding and fixing and the splicing between the terminal end and pigtail. Welding. Optical fiber distribution frame (ODF) is used for terminating and distributing central office trunk optical cables in optical fiber communication systems, and can easily realize the connection, distribution and scheduling of optical fiber lines. As the degree of network integration becomes higher. Default's Neutral-ODU-B-48C is an advanced ODF unit box designed for high-capacity fiber optic management. With optional adapters like SC, LC, FC, and E2000, it serves engineers and procurement personnel looking for. 48Cores ODF optical fiber distribution frame is standard 19 inch chassis, capacity 48Cores, It is high density, all modular design. This devices works as a protective device to protect fiber.
