Cable tray reverse right angle

Overview

It is not possible to rotate cable tray about its cross-section axis, but with beams you can. Whilst this can be achieved with structural beam elements, this cannot be achieved with the out of the box cable tray families. (A) = cable tray width (600mm) and B = Size of angle (22°) First you have to find (C) which is found by dividing 90°. However, Cable Trays do have certain limitations in that the channel shape can only be set to a horizontal aspect where the bottom edge runs parallel to its supports. In many applications particularly in the infrastructure space, there is a need to be able to rotate the 'C' channel section so that. EzyStrut offers some of the strongest cable trays in their classes, and produces them to a very high structural and visual standard. Cable trays offer continuous support of cables, are lightweight, quick and straight forward to install just about anywhere, and generally mean that changing cabling.
