

Does Shangshang Cable manufacture optical cables

Overview

Jiangsu Shangshang Cable Group Co., Ltd. Jiangsu Shangshang Cable Group Co., Ltd. is a Chinese company. Industry: Manufacturing; Electrical machinery and Expe.

Key Takeaways

Jiangsu Shangshang Cable Group is a major manufacturer of power, special, and industrial cables, but there is no confirmed evidence that it produces optical or fiber optic cables. Company Overview

Jiangsu Shangshang Cable Group, founded in 1967, is a leading Chinese cable manufacturer with a strong focus on research, development, and production of electric wires and cables. The company produces a wide range of products, including power transmission cables (from 220V to 500kV), special cables for nuclear power plants, shipbuilding, rail transit, industrial manufacturing, and construction projects. Shangshang Cable has been involved in major national projects such as the Beijing Daxing International Airport, Beijing-Shanghai High-speed Railway, and nuclear power plant projects.

Product Range

Shangshang Cable's offerings include:

- Power cables for residential, industrial, and high-voltage applications
- Specialty cables for nuclear, mining, and industrial use

- Cables for infrastructure projects including airports, bridges, and railways
- Nuclear-grade cables developed for AP1000 nuclear plants, recognized as national champion products The company exports to over 80 countries and has a production capacity exceeding 30 billion yuan annually .

Optical Cable Manufacturing

Despite Shangshang Cable's extensive product portfolio, none of the sources explicitly list optical or fiber optic cables among their products . Leading Chinese fiber optic cable manufacturers, such as YOFC, are typically highlighted separately in industry rankings, and Shangshang Cable does not appear in top lists for fiber optic production . This suggests that while Shangshang Cable is a major player in power and specialty cables, it likely does not manufacture optical cables.

Conclusion

Jiangsu Shangshang Cable Group is a prominent manufacturer of power, industrial, and special-purpose cables, including nuclear-grade and high-voltage cables. However, based on available information, there is no evidence that Shangshang Cable produces optical or fiber optic cables, and companies specializing in fiber optics are generally distinct from Shangshang's core product lines .
