

RIVO MULTITRADE OPTICAL SYSTEMS

EU Fiber Optic Cable Engineering Maintenance Company

Overview

Astro Alliance is a highly specialized company, authorized in the deployment of any type of fiber optic cable.

Key Takeaways

Leading EU companies for fiber optic engineering and maintenance include RAM TEL, Denergus, Ametrix Ltd, Full Fibre Services, and Full Fibre Solutions, offering end-to-end network solutions. RAM TEL

RAM TEL provides complete fiber optic infrastructure services, from design and engineering to installation, splicing, testing, and long-term maintenance. They serve telecommunications providers, construction companies, and businesses requiring high-specification networks. Their services include precision fiber splicing, performance testing, troubleshooting, and support for broadband expansion, ensuring reliable and scalable connectivity across projects in Europe .

Denergus

Denergus specializes in fiber cabling for commercial buildings, industrial facilities, data centers, and smart properties. They offer site surveys, system design, installation, splicing, testing, and labeling, all performed by certified technicians following EU standards. Their services cover both single-mode and multi-mode fiber, providing future-proof and high-performance network solutions .

Ametrix Ltd

Ametrix Ltd focuses on data center infrastructure, delivering fiber optic cabling, network installation, equipment deployment, and on-site technical support. They operate across more than 12 European countries, including the UK, Ireland, Netherlands, Germany, France, and the Nordics. Their expertise includes single-mode and multi-mode installation, splicing, testing, certification, structured cabling, and turn-key network deployment for hyperscale and colocation environments .

Full Fibre Services

Full Fibre Services (FFS) offers end-to-end turn-key fiber solutions, including strategic planning, network architecture, deployment, testing, and long-term maintenance. They specialize in full-fiber broadband and dark fiber networks for enterprises and government bodies, supporting both urban and rural rollouts. FFS emphasizes scalable, high-speed, and reliable infrastructure, leveraging decades of telecommunications engineering experience .

Full Fibre Solutions

Full Fibre Solutions provides customized fiber optic cabling, including long-distance deployments, short-distance cabling, and patching. Their technicians are skilled in single-mode, multi-mode, and ribbon splicing, with rigorous testing to ensure network integrity. They also offer 24/7 emergency repairs and rapid technician mobilization, making them suitable for both small-scale and large-scale network projects . These companies collectively cover the full lifecycle of fiber optic network projects in the EU, from planning and installation to testing, certification, and ongoing maintenance, ensuring high-performance and reliable connectivity for diverse applications.
