

Fiber Optic Fast Connector 6-core CIF Price

Overview

Amazon.com: Fiber Optic Connector 20pcs SC/APC Fiber Fast Connector for 2x3mm Butterfly Fiber Cable | Quick connectors for 2x3mm butterfly drop cable. Singl.

Key Takeaways

6-core Fiber Optic Fast Connectors typically range from \$2 to \$15 per unit depending on type, quantity, and supplier.

Pricing Overview

- Alibaba Suppliers: 6-core fiber connectors are widely available on Alibaba, with prices varying based on manufacturer, connector type, and order volume. Bulk orders generally reduce the per-unit cost, and options include both embedded and non-embedded types .
- YingFeng Fast Connectors: Industrial-grade 6-core fast connectors designed for FTTH networks are offered with high precision and low insertion loss ($\leq 0.2\text{dB}$). While exact prices are not listed publicly, these connectors are positioned as cost-effective alternatives to fusion splicing, typically priced in the low-to-mid range for field assembly connectors .

- Mouser and DigiKey: Authorized distributors like Mouser and DigiKey provide connectors from leading manufacturers (Amphenol, Broadcom, TE Connectivity, etc.) with pricing dependent on quantity and specifications. Prices can range from a few dollars per connector for standard LC or SC types to higher for specialized or pre-polished field-installable connectors .

- AFL FASTConnect: Factory pre-polished 6-core connectors for single-mode or multimode fibers are available in packs (e.g., 6-pack), offering immediate low-loss termination. Pricing is typically higher than standard connectors due to pre-polished technology and quick installation features .

Factors Affecting Price

- Connector Type: Embedded (factory pre-polished) connectors are more expensive than non-embedded types due to higher manufacturing precision and lower insertion loss .

- Fiber Compatibility: Single-mode connectors generally cost more than multimode connectors. Compatibility with 250 μm , 900 μm , or larger cordage can also influence price .

- Quantity: Bulk purchases reduce per-unit cost significantly. Small orders or single units are priced higher.

- Supplier and Brand: Premium brands or distributors may charge more for guaranteed quality, certifications, and faster shipping .

Recommendation

For FTTH or high-speed network deployments, embedded 6-core fast connectors are recommended for reliability and low insertion loss. For budget-conscious projects, non-embedded connectors may suffice if minor signal loss is acceptable. To obtain the most accurate price, it is advisable to request a quote from suppliers like Alibaba, YingFeng, or authorized distributors such as Mouser and DigiKey, specifying the required quantity and fiber type.
