

Finnish Low-Voltage Complete Sets of Equipment

Overview

Electrical works in Finland For the construction of electrical appliances and delivery of them onto the market, the requirements of the HV/LV Complete Elec.

Key Takeaways

Finland offers a range of low-voltage complete equipment sets through specialized suppliers like Finecomp, ABB, Alfen Elkamo, and VEO Electrification, providing modular, compliant, and turnkey solutions for industrial and residential applications.Key Suppliers and Offerings

Finecomp Oy specializes in low-voltage enclosures and panel structures for both household and heavy industrial applications. Their products are component-independent, modular, and designed for fast project execution. Finecomp emphasizes quality, environmental responsibility, and transparency, offering third-party-certified Environmental Product Declarations (EPDs) for all modular low-voltage enclosures and panel structures, which helps customers reduce environmental impact while ensuring compliance with Finnish standards . ABB Finland provides a comprehensive range of low-voltage products, including switchboards, distribution boards, and complete electrical packages. ABB's solutions focus on safety, reliability, and energy efficiency, and they also offer automation, measurement, and analytics products to optimize industrial operations . Alfen Elkamo develops and markets low-voltage switchboards and distribution systems, including transformer substations. Their solutions are widely used in industrial and infrastructure projects, and they integrate renewable energy sources such as solar and wind power. Alfen Elkamo also collaborates with grid operators to ensure future-proof electricity distribution . VEO Electrification offers modular substation concepts that include low- and medium-voltage equipment. Their turnkey solutions are predesigned and proven, allowing for safe, sustainable, and cost-efficient installations. VEO's substations are suitable for national grids, regional networks, and industrial facilities, and they provide full EPC (Engineering, Procurement, Construction) responsibility .

Compliance and Safety

In Finland, all electrical works, including installation of low-voltage equipment, are regulated by law. Companies must have qualified personnel, proper tools, and follow operational safety regulations. Supervisors of electrical works are responsible for ensuring that all installations and equipment comply with technical rules and safety standards . Suppliers like ABB, Finecomp, and VEO design their products to meet these Finnish and EU safety requirements, ensuring legal compliance and operational safety.

Applications

Finnish low-voltage complete sets are used in:

- Industrial facilities: heavy machinery, automation, and process control
- Commercial buildings: office complexes, shopping centers, and infrastructure
- Renewable energy projects: solar farms, wind turbines, and hybrid power plants
- Residential and small-scale installations: modular consumer units and household switchboards These solutions are modular, scalable, and often preassembled, which reduces installation time and ensures high reliability and safety.

Conclusion

For anyone seeking low-voltage complete sets of equipment in Finland, suppliers like Finecomp, ABB, Alfen Elkamo, and VEO Electrification provide a wide range of modular, compliant, and turnkey solutions suitable for industrial, commercial, and residential applications. Their products are designed to meet Finnish safety regulations, support renewable energy integration, and offer efficient, reliable power distribution .
