

Georgian Fiber Optic Communication Blow Cable Manufacturer

Overview

Browse MacRaesBlueBook for complete listings of Fibre Optic Cable Assemblies Manufacturers in Georgia.

Key Takeaways

JSC Sakcable is the primary Georgian manufacturer of fiber optic and other cable products, complemented by suppliers of fiber blowing equipment like American Tech Supply. Local Manufacturer: JSC Sakcable

JSC Sakcable is the largest cable manufacturer in Georgia, established in 1958 and located in Zestafoni. The company produces a wide range of cable products, including fiber optic cables, using high-quality raw materials sourced internationally and modernized production equipment in cooperation with German machinery manufacturer SKET . The factory employs over 200 professionals and maintains strict quality control through an accredited laboratory, ensuring reliable and durable cable products suitable for telecommunications and infrastructure projects .

Fiber Blowing Equipment Suppliers

For the installation of blown fiber optic cables, American Tech Supply provides high-performance fiber blowers across Georgia. These machines allow contractors and telecom providers to efficiently jet fiber through microducts, reducing installation time and minimizing network disruption. The company offers both rental and purchase options, along with technical support, maintenance, and operational training . This is particularly useful for deploying MicroCore® or similar blown fiber systems, which are designed for underground duct networks and allow flexible, scalable fiber deployment .

International Blown Fiber Cable Options

While local manufacturing is primarily handled by Sakcable, international products like AFL MicroCore® offer advanced blown fiber solutions suitable for backbone networks and FTTx deployments. These cables are lightweight, flexible, and designed for minimal friction to enable long jetting distances, reducing installation costs and future-proofing networks .

Strategic Infrastructure Example

Georgia also operates high-capacity fiber links such as the Caucasus Cable System, a submarine communications cable connecting Poti, Georgia to Balchik, Bulgaria. While this cable was manufactured and laid by TE Connectivity, it highlights the strategic importance of fiber infrastructure in the region and the need for reliable local cable manufacturing and installation capabilities .

Summary

- Manufacturer: JSC Sakcable – primary Georgian producer of fiber optic cables .
- Equipment Supplier: American Tech Supply – provides fiber blowers and installation support .
- International Options: AFL MicroCore® – advanced blown fiber optic cable for flexible deployment . These resources collectively support the design, procurement, and deployment of fiber optic networks in Georgia, from local manufacturing to advanced installation technologies.
