

How much does a fiber optic splice tray usually cost

Overview

Amazon.com: Fiber Splice Tray Eaton Tripp Lite Fiber Optic Splicing Enclosure, Fiber Splice Dome, 144 Fiber Capacity Single Mode & Multimode, 6 Cable Trays.

Key Takeaways

Fiber optic splice trays typically cost between \$5 and \$50 each, depending on capacity, type, and brand. Price Range

- Small trays (6–12 fibers): Usually range from \$5 to \$15 per tray, suitable for simple installations or low-density splicing .
- Medium trays (24–36 fibers): Typically cost \$15 to \$30, commonly used in network rooms or intermediate distribution frames .
- Large trays (48–72 fibers): Can range from \$30 to \$50 or more, designed for high-density fiber management in data centers or central offices .

Factors Affecting Cost

- Tray Capacity: Higher fiber count trays are more expensive due to increased material and design complexity.
- Type of Splice: Trays designed for fusion splicing may cost slightly more than those for mechanical splicing because of additional protective features .
- Brand and Quality: Premium brands like Corning, AFL, or PLP often charge more for durability and compliance with industry standards .

- **Accessories:** Some trays include protection sleeves, mounting hardware, or cable management features, which can increase the price .

- **Bulk Orders:** Purchasing in bulk can reduce the per-unit cost, especially from wholesale suppliers like CableWholesale .

Where to Buy

- **Online Retailers:** Amazon offers a variety of trays for different fiber counts and types .

- **Specialized Suppliers:** FS.com, FiberOptics4Sale, and CableWholesale provide trays with detailed specifications and bulk discounts . In summary, the cost of a fiber optic splice tray depends on capacity, type, brand, and included accessories, with most trays falling in the \$5-\$50 range. For large-scale installations, buying from specialized suppliers or in bulk can provide better pricing and options.
