

How to cover the electrical distribution box in the corridor

Overview

If your panel box is in a narrow corridor where a swinging cabinet door would hit the opposite wall, a slider is your best friend. For a modern look, I often use a piece of frosted acrylic or perforated metal mounted on a simple aluminum U-channel track. Any cover or concealment structure must not permanently restrict movement within these specific dimensions. The panel's hinged cover must be. The most straightforward way to cover a panel box is with artwork, but simply hanging a picture on a nail isn't quite right for this application. An electrical panel enclosure is designed to protect the breakers from dust and damage, and many stylish options exist to hide electrical panel eyesores. While essential, these panels are often an eyesore, especially when located in visible areas such as living rooms, kitchens, or hallways. Below are some great ideas on how to cover.
