Is there a power outlet next to the fiber distribution box

Overview

Much like your existing broadband connection (if you have one), full fibre broadband requires the use of a router and an additional connection box. Both of these devices need to be plugged in to work and we ask that the power sockets are close to your fibre entry point. Also, will the Verizon power supply take up or cover the full power outlet (two plugs) or would I still have access to one plug for my router, etc. ?

Power supply needs one outlet. This assumes no coax/ video service. ONT can be inside or outside, most put it inside though but you can tell the tech. A Fiber Optic Socket Wall Outlet, also called a fiber optic faceplate or optical termination outlet, is a mounted interface designed to house and protect fiber optic terminations, such as SC, LC, or ST connectors. It's typically installed on walls to provide a clean endpoint for incoming fiber drop. Running fiber internally involves extending this high-speed link from the service entry point to a centralized location, such as a dedicated media closet or network rack. Additional sockets may also. Aerial Service Drop: A cable coming from a pole to your house, connected at a small box called an MST. Keep this in mind when deciding on placement.
