

RIVO MULTITRADE OPTICAL SYSTEMS

Jamaican 4-core single-mode optical cable manufacturer

Overview

Cables & Wires JMD 5,062.50 JMD 6,944.00 25.0MM 4 CORE SWA XLPE CABLE *NET
About Us New Light Optics Technology Limited specialized in the Optical communic.

Key Takeaways

Currently, there is no confirmed Jamaican manufacturer exclusively producing 4-core single-mode optical cables, but local suppliers like TELiCON Group provide fiber optic solutions, and global manufacturers can supply these cables to Jamaica. Local Options in Jamaica

TELiCON Group is a Jamaican company offering fiber optic services, network cabling, and IT infrastructure solutions. While they provide installation, maintenance, and fiber optic products, there is no explicit evidence that they manufacture 4-core single-mode optical cables locally. They may, however, act as a distributor or integrator for imported fiber optic cables. Panjiva lists Jamaican optical cable suppliers, which could help identify local vendors or distributors. These suppliers may provide single-mode fiber cables, including 4-core variants, sourced from international manufacturers.

Global Manufacturers and Suppliers

If local manufacturing is unavailable, several international manufacturers produce high-quality 4-core single-mode optical cables suitable for deployment in Jamaica:

- Jera Line: Offers 4-core single-mode fiber optic cables designed for FTTH and GPON networks, tested according to ISO9001:2015 standards . Their cables include PE covers, aramid yarn reinforcement, and PBT loose tubes with jelly compounds for durability.
 - Fiber4U: Provides custom single-mode fiber cables with flexible sheathing, armored options, and eco-friendly materials . They can manufacture cables with specific core counts, including 4-core configurations.
 - Other notable global suppliers: Corning, Panduit, Superior Essex, and OFS Optics are recognized for high-performance single-mode fiber cables suitable for telecommunications and enterprise networks .
- Considerations for Procurement
- Core Count: Ensure the cable meets the 4-core requirement for your network design.
 - Environmental Suitability: Outdoor or aerial installations may require armored or UV-resistant sheathing.
 - Standards Compliance: Look for ISO9001 certification, OTDR testing, and adherence to OS2 single-mode fiber standards.
 - Local Support: Even if the cable is imported, working with a local integrator like TELiCON can simplify installation and maintenance.

Recommendation

For projects in Jamaica requiring 4-core single-mode optical cables, the most practical approach is to source from international manufacturers like Jera Line or Fiber4U and coordinate with local integrators such as TELiCON Group for installation and support. This ensures access to high-quality, tested cables while leveraging local expertise for deployment.
