

Lebanon Airport Fiber Optic KVM Technology Brand

Overview

OptiLink — Optical Transceivers & Fiber Optic Equipment | LebanonLebanon's premier supplier of SFP, SFP+, QSFP28, GPON, and fiber optic equipment. Compatib.

Key Takeaways

IHSE and Rextron are leading providers of fiber optic KVM solutions available in Lebanon, suitable for high-security and long-distance applications.IHSE KVM Solutions

IHSE is a German manufacturer specializing in KVM extension and switching solutions that support fiber optic connections. Their systems allow remote access to computers over long distances, managing keyboard, video, and mouse signals along with USB, audio, and SDI video. IHSE KVM solutions are modular and can use fiber, Cat X, or hybrid cabling, making them suitable for airports and enterprise environments where secure and reliable remote control is required . They also offer matrix switches for multiple users to access multiple computers simultaneously.

Rextron Fiber Optic KVM Extenders

Rextron provides fiber optic KVM extenders capable of transmitting video, audio, USB, IR, and RS-232 signals over distances up to 70 km. Their products support multiple video interfaces including HDMI, DisplayPort, DVI, and VGA, with resolutions up to 4K 60Hz. Rextron extenders are designed for high-EMI environments, which is advantageous for airport operations where electromagnetic interference can be a concern. Models like the FXMS-M02K and FXA1MU series allow flexible deployment for remote console access and secure control of critical systems .

Local Suppliers in Lebanon

For procurement and support, companies such as OptiLink, Danoun Tech, and Fiber Works & Communications (FWC) provide fiber optic infrastructure and KVM solutions in Lebanon. OptiLink specializes in optical transceivers and fiber equipment compatible with major brands like Cisco, Huawei, and MikroTik, which can complement KVM installations . FWC has experience with enterprise and government projects, including FTTX infrastructure, and can provide system integration and technical support for KVM deployments .

Summary

While the exact brand used at Lebanon Airport is not publicly confirmed, IHSE and Rextron are the most prominent fiber optic KVM technology providers available in Lebanon. Both offer high-performance, secure, and long-distance KVM solutions suitable for airport operations, and local suppliers like OptiLink and FWC can facilitate procurement, installation, and support. These solutions ensure reliable remote access to critical systems while maintaining security and operational efficiency.
