

Low-power optical module 200G distributor

Overview

200G Modules The optical amplifier module developed by GIGALIGHT is designed for long-distance transmission systems in digital optical fiber 800G/400G/200G.

Key Takeaways

Leading distributors of 200G low-power optical modules include GIGALIGHT, UnitekFiber, Mellanox (NVIDIA), Broadex Technologies, and Westbury Photonics. Key Distributors and Offerings

GIGALIGHT provides a wide range of 200G QSFP56 and QSFP-DD optical modules suitable for data centers, 5G fronthaul, and high-speed interconnects. Their modules support low-power operation and include BER testing tools, active electrical loopback modules, and adapters for network upgrades, covering 10G to 800G rates across multiple form factors such as SFP+, QSFP28, QSFP56, QSFP-DD, and OSFP .

UnitekFiber specializes in 200G QSFP-DD and QSFP56 transceivers, offering SR4, FR4, DR4, and LR4 variants. These modules operate at 200 Gbps using 50G PAM4 modulation and are compatible with single-mode (OS2) and multi-mode (OM3/OM4) fibers. They are widely deployed in hyperscale data centers, HPC clusters, and AI/ML fabrics . Mellanox (NVIDIA) has launched a next-generation portfolio of 200G optical transceivers optimized for low power consumption. These modules feature advanced DSP technology, proprietary thermal management, and industrial-grade components, achieving up to 42% lower power usage while maintaining high reliability and extended reach, making them ideal for sustainable, high-density network deployments . Broadex Technologies offers cost-effective 200G QSFP56 modules using COB technology, supporting high-speed bit rates up to 200 Gbps over distances up to 2 km. These modules are designed for robust performance in next-generation data centers and communication networks . Westbury Photonics provides a variety of 200G QSFP56 transceivers, including SR4 and FR4 types, with transmission distances ranging from 100 meters to 2 km. They offer both direct detect and coherent modules, suitable for data center interconnects, metro, and long-haul fiber optic networks .

Considerations for Selection

- Form Factor: QSFP56 for single-row 200G, QSFP-DD for double-density applications.
 - Power Efficiency: Low-power modules reduce energy consumption in high-density deployments.
 - Distance and Fiber Type: Choose SR4 for short-range multimode, LR4 for long-range single-mode.
 - Application: Data centers, HPC clusters, AI/ML fabrics, metro or long-haul networks.
- These distributors provide reliable 200G low-power optical modules suitable for modern high-speed networking infrastructure, with options tailored for energy efficiency, high density, and diverse deployment scenarios.

200G Modules

The optical amplifier module developed by GIGALIGHT is designed for long-distance transmission systems in digital optical fiber

200G Optical Transceivers | High-Speed QSFP56 Modules for Data

Boost network performance with 200G optical transceivers. Designed for data centers, 5G, and cloud infrastructure, our QSFP56

200G Optical Transceivers: High-Density QSFP56 & QSFP-DD Modules

Shop high-performance 200G optical transceivers including QSFP56 and QSFP-DD form factors. Fully compliant with 200GBASE

200G Modules

GIGALIGHT provides 100G, 200G, 400G and 800G pluggable digital coherent optical transceiver modules (DCO) and non-coherent

200G QSFP56 LR4 EML LWDM4 10km/20km Optical Transceiver

GIGALIGHT 200G QSFP56 LR4 optical transceiver module is used for long-distance transmission in the field of data communication

Global 200G Optical Module Market Size, Growth Analysis, Trends ...

The 200G optical module market represents a critical segment within the broader optical communications industry,

200G/400G/800G Optical Transceiver Modules | FiberMall

200G/400G/800G optical module features up to 40km transmission distances using QSFP56/QSFP-DD footprints for data center

200G Coherent CFP2 Optical Module Explained

The 200G Coherent CFP2 optical module, integrating coherent detection and high-performance DSP, enables higher

200G Optical Module Market Research Report 2034

The 200G Optical Module market was valued at \$2.6 billion in 2025 and is projected to reach \$5.73 billion by 2034, growing at 9.2%

200G 400G 800G Optical Transceiver Modules | AscentOptics

200G 400G 800G Transceivers are the latest generation of optical modules that enable high-speed data transmission over fiber optic

200G Optical Module Market Size And Projection

Conclusion The rapid growth of the 200G optical module market is a clear indicator of the increasing importance of

Optical Transceiver

The optical transmitter and receiver products of Gearlink are trusted by customers with low power consumption, high compatibility,

200G QSFP56 FR4 Transceiver Module | Westbury Photonics

Our 200G FR\$ QSFP56 optical transceiver module is a hot-pluggable transceiver enabling data rates up to 200 Gigabit.

Global 200G Optical Module Market Research Report 2025 (Status

The 200G optical module is a high-speed networking device used in data centers and telecommunications networks to transmit data

Complete Guide to 200G Optical Transceivers | JTOPTICS

200G AOC 200G Active Optical Cables (AOC) integrate the optical transceiver electronics directly into each end of a fixed-length

100G 200G 400G Optical Module Trends | Infinol

Infinol reviews 100G, 200G and 400G optical module trends, helping network buyers understand changing data center and telecom

200G Optical Module Market Size and Forecast 2035

The growing need for high-speed data transmission in data centers, telecom networks, and enterprise IT infrastructure is driving the

Wholesale Optical Transceivers Module | 100G QSFP28, 40G QSFP

Shop high-speed optical transceivers from Unitekfiber. We offer 100% compatible 40G, 100G, and 400G QSFP-DD modules for data
