

RIVO MULTITRADE OPTICAL SYSTEMS

Price List for Gigabit Fiber Optic Cables

Overview

Cost of Fiber Optic Cable: Pricing Guide (2026) Discover the cost of fiber optic cable in this pricing guide. Learn material prices, installation Fiber Opti.

Key Takeaways

Fiber optic cable costs range from \$1 to \$6 per foot for materials, with gigabit internet service typically costing \$70–\$100 per month including installation. Material Costs

The cost of fiber optic cable depends on type, fiber count, and application. Single-mode fiber is generally less expensive per foot than multimode fiber but requires more costly equipment, while multimode fiber (OM3/OM4) is common for high-speed LANs and data centers. Retail prices for fiber cable materials range from \$1 to \$6 per foot, with simple 1-core FTTH drop cables costing around \$0.13 per foot and high-count backbone cables (e.g., 288 strands) reaching \$6 per foot or more. Bulk wholesale purchases can reduce costs to \$0.09–\$1.52 per foot depending on quantity and specifications .

Installation Costs

Installation significantly increases total expenses. For commercial projects with 100–200 network drops, costs typically range from \$15,000 to \$30,000, while ISPs laying new fiber infrastructure may spend \$5,000 to \$20,000 per mile, depending on terrain, permitting, and whether the fiber is underground or aerial . Residential installation fees can vary from \$1,500 to \$7,000, though many providers offer free or discounted installation for new fiber orders .

Gigabit Internet Service

For residential users, gigabit fiber internet plans generally cost \$70 per month for 1 Gbps speeds, with higher tiers like 3 Gbps or 8 Gbps costing \$100–\$150 per month. These plans usually include installation, a Wi-Fi router, mesh extenders, and unlimited data without extra fees. Monthly service fees reflect the cost of infrastructure deployment, maintenance, and equipment.

Factors Affecting Price

- Cable type: Single-mode vs multimode, indoor vs outdoor, armored vs standard jacket
 - Fiber count: More strands increase material cost
 - Installation complexity: Trenching, splicing, and termination labor
 - Location: Urban areas may have lower installation costs than rural or difficult terrain
 - Equipment: Pre-terminated assemblies, patch panels, and connectors add to cost
- In summary, material costs for gigabit-capable fiber optic cable range from \$1 to \$6 per foot, while residential gigabit internet service typically costs \$70–\$100 per month, with installation and project complexity influencing the total upfront investment.
