

RIVO MULTITRADE OPTICAL SYSTEMS

Price of Main Distribution Box Label for Construction Site

Overview

Choose from a variety of colors and sizes to keep your facility compliant and your electrical systems easy to navigate.

Key Takeaways

Main distribution box labels for construction sites typically cost between \$2 and \$5 per label, with packs of 10 labels available for around \$20-\$50 depending on material and compliance standards. Cost Overview

For construction site electrical panels, label pricing depends on material, durability, and compliance. Standard self-adhesive vinyl labels with clear laminate, suitable for indoor or outdoor use, are commonly sold in packs of 10, with prices ranging from \$20 to \$50 per pack. Per-unit costs for individual labels generally fall between \$2.00 and \$5.00, depending on quality and weather resistance. Higher-quality labels that resist moisture, heat, and UV exposure are recommended for construction environments to ensure longevity and safety compliance.

Factors Affecting Price

- Material: Vinyl or laminated labels are more durable and suitable for outdoor construction sites.
- Compliance: Labels adhering to standards like BS 7671 or local electrical codes may cost more due to regulatory requirements.

- **Quantity:** Buying in bulk packs reduces per-unit cost. Packs of 10 labels are common .
 - **Labor:** If professional installation is required, labor costs may add \$250-\$450 for a full panel labeling project, though DIY labeling can reduce this expense .
 - **Additional Costs:** Permits, delivery, or custom printing may add \$10-\$200 depending on project scope .
- Practical Recommendations**
- For a construction site, choose weather-resistant, laminated labels to withstand dust, moisture, and temperature fluctuations .
 - Label all circuits and the main breaker for safety and compliance, even if only a portion of the panel is actively used .
 - Consider bundling labeling with panel installation or maintenance to reduce labor overhead . By planning for both material and labor costs, a typical main distribution box labeling project on a construction site can range from \$25 to \$730, depending on panel size, number of circuits, and label quality .
