

Price of cable tray side upturn bend

Overview

Cable Tray Cable Tray Fitting, 90° Junction Kit. Material: Carbon Steel. Finish: Electroplated Zinc. Includes: (1) Hardware for (1) Tee (2) 90° WESCOCable.

Key Takeaways

Cable tray side upturn bends typically vary in price depending on material, duty rating, and size, with medium-duty bends often starting around £10-£30 and heavy-duty versions costing more.

A side upturn bend is a cable tray fitting that allows the tray to change direction vertically, helping route cables around obstacles or structural elements. These bends are available in light, medium, and heavy-duty ratings, and are usually made from pre-galvanised steel, hot-dipped galvanised (HDG) steel, or stainless steel for corrosion resistance .

Factors Affecting Price

- Duty Rating:
 - Medium-duty bends are suitable for commercial or light industrial use and are generally more affordable .
 - Heavy-duty bends are designed for industrial environments with higher load requirements and cost more due to thicker steel and HDG treatment .
- Material and Finish:
 - Pre-galvanised steel is common and moderately priced.
 - HDG steel or stainless steel increases durability and price .

- Size and Dimensions:
- Standard widths (e.g., 100mm, 150mm, 200mm) affect cost. Larger trays require more material and are more expensive .
- Supplier and Delivery:
- UK suppliers like Netceed, CMW Ltd, and Shop4 Electrical offer medium-duty bends with free delivery on orders over £100 .
- Heavy-duty bends may require contacting suppliers for bulk or trade pricing .

Typical Price Range

- Medium-duty side upturn bends: approximately £10-£30 each, depending on size and supplier .
- Heavy-duty side upturn bends: prices can range from £40-£80 or more, especially for HDG steel and larger sizes . For exact pricing, it is recommended to check supplier websites or request a quote, as prices fluctuate based on stock, size, and delivery options. Suppliers often provide next-day delivery for in-stock items in the UK .

Additional Tips

- Pair bends with cable tray brackets and couplers for secure installation .
- Consider floor boxes, risers, and tees if your project requires complex routing .
- For large projects, bulk orders may qualify for trade discounts. By considering these factors, you can estimate the cost of a side upturn bend and plan your cable management project efficiently.
