## Price of outdoor electrical distribution box protection frame

### Overview

Outdoor Breaker Boxes Get free shipping on qualified Outdoor Breaker Boxes products or Buy Online Pick Up in Store today in the Breaker Boxes Whatever you'.

### Key Takeaways

Outdoor electrical distribution box protection frames typically range from £50 to over £500 depending on size, material, and weatherproofing features.Pricing Overview

The cost of an outdoor electrical distribution box protection frame depends on several factors including material construction, IP rating, size, and additional protective features. Basic weatherproof enclosures for residential use can start around £50-£100, while larger, heavy-duty industrial or commercial frames with stainless steel construction, IP65-IP66 waterproofing, and anti-vandalism features can exceed £500 .

#### Factors Affecting Cost

- Material: Plastic or polycarbonate enclosures are cheaper, whereas stainless steel (AISI 304L or 316L) or aluminum frames are more expensive but offer superior durability and corrosion resistance .
- Weatherproofing: IP65 or higher ratings for dust and water resistance increase the price. Frames designed for extreme outdoor conditions, including tropical or coastal environments, carry a premium .

- **Size and Capacity:** Larger frames that accommodate multiple circuits, breakers, or 19" rack systems cost more due to increased material and manufacturing complexity .
- **Additional Features:** Lockable doors, interlock mechanisms, arc fault protection, and modular designs for future upgrades can significantly influence pricing .
- **Installation and Compliance:** Some units include mounting hardware and comply with international standards (IEC 61439, UL 508A, CE, RoHS), which can affect the overall cost .

#### Where to Buy

- **Online Retailers:** Amazon UK offers a range of portable weatherproof enclosures suitable for smaller residential applications .
- **Specialized Suppliers:** Companies like Delvalle and Yespan provide industrial-grade outdoor enclosures with customization options for anti-vandalism, corrosion resistance, and climate control .
- **Commercial Panels:** For larger installations, outdoor distribution panels with IP65 waterproofing, surge protection, and lockable doors are available from suppliers targeting industrial and commercial sectors .

#### Summary

For a standard residential outdoor electrical box frame, expect to pay £50-£150, while industrial or commercial-grade frames with advanced protection and durability features can range from £300-£600 or more. Prices vary based on material, size, IP rating, and additional protective or monitoring features, so it is recommended to compare suppliers and specifications before purchase .
