

RIVO MULTITRADE OPTICAL SYSTEMS

Price of sealing strips for construction site electrical distribution boxes

Overview

Electrical Seals | McMaster-Carr Choose from our selection of electrical seals, including gasket tape for enclosures, outlet boxes and enclosures, and more.

Key Takeaways

Sealing strips for electrical distribution boxes typically range from \$1 to \$5 per meter for standard rubber or silicone types, with custom or UL-rated options costing more. Material and Type Considerations

Sealing strips are available in EPDM rubber, silicone, foam, sponge, and composite materials. Each material offers different properties such as weather resistance, flame retardancy, elasticity, and chemical resistance, which affect the price and suitability for construction site electrical boxes . UL-rated gaskets for enclosures provide additional protection against dust, moisture, and chemicals, often increasing cost .

Supplier Pricing and Minimum Orders

- Alibaba suppliers offer EPDM and silicone sealing strips with a minimum order quantity (MOQ) of 100 meters for standard products. Prices generally start around \$1-\$3 per meter, depending on material and thickness, while custom or OEM orders may require 1,000 units and cost more .
- McMaster-Carr and similar industrial suppliers provide a wide range of sealing strips, with prices varying by size, material, and hardness, typically in the \$2-\$5 per meter range for standard industrial-grade strips .

- Seal & Design specializes in custom electrical enclosure gaskets, including UL-rated silicone and Viton options. Pricing is usually quoted per project due to customization, but expect higher costs than standard strips for UL compliance and weatherproofing .

Practical Tips

- For construction site electrical boxes, choose weather-resistant, flame-retardant, and elastic strips to ensure durability.

- Consider pre-cut or custom gaskets if the enclosure has complex shapes or requires UL50E compliance.

- Always check MOQ and shipping costs, as bulk orders reduce per-meter cost but may require storage planning. In summary, standard sealing strips cost roughly \$1-\$5 per meter, while custom, UL-rated, or high-performance materials can be significantly higher. Supplier quotes should be requested for precise pricing based on material, length, and application requirements .
