

RIVO MULTITRADE OPTICAL SYSTEMS

Price per ton of 288-core optical cable

Overview

288 Count Fiber Optic Cables We stock a full array of multimode fiber cable and singlemode fiber optic cables in loose tube, indoor, indoor outdoor, plenum.

Key Takeaways

The estimated price of 288-core optical fiber cable is approximately \$16,000–\$20,000 per ton, depending on type, construction, and supplier. Pricing Overview

288-core fiber optic cables are high-density cables used in data centers, metropolitan networks, and FTTH deployments. Wholesale prices for these cables vary based on fiber type, construction, and whether the cable is pre-terminated. For example, ADSS 288-core cables are available at around \$8.21 per foot for bulk orders, while high-quality single-mode backbone cables can reach \$6 per foot or more .

Factors Affecting Price

- **Fiber Type:** Single-mode fiber (SMF) is generally more expensive than multimode fiber (MMF) due to longer transmission distances and higher performance .
- **Cable Construction:** Armored, gel-free, or double-jacket cables cost more than standard loose-tube designs. Outdoor-rated cables with direct burial capability are priced higher .
- **Bulk Orders:** Purchasing in reels or tons reduces the per-foot cost, especially from manufacturers in China offering OEM/ODM services .

- Additional Features: Ribbon fiber, LSZH jackets, and pre-terminated assemblies increase the overall cost .

Estimating Price per Ton

A typical 288-core cable weighs approximately 50–60 kg per 1,000 feet depending on construction. Using a bulk price of \$8 per foot, 1 ton (2,000 lbs ≈ 907 kg) of cable would cost roughly \$16,000–\$20,000. Prices may vary with supplier, shipping, and regional tariffs.

Conclusion

For procurement planning, expect \$16,000–\$20,000 per ton for standard 288-core optical fiber cables, with higher-end armored or pre-terminated cables exceeding this range. Always confirm with suppliers for MOQ, shipping, and customization options to get precise pricing .
