RGB Synchronous Light Changing Module

Overview

Unify your PC's lighting ecosystem with intelligent control. This Skydimo-developed module seamlessly manages ARGB fans and lighting, syncing with your screen and audio to create cohesive visual narratives. Multiple modes let you craft the perfect ambiance for any activity. Besides adjusting the color, area, lighting effect and pattern on the motherboard, you are able to do more with ASRock Polychrome SYNC function, let your memory, case, fan, cooler and other components sync. 20 PCS Color RGB LED Module, 12V Super Bright 2835 3 LED Module Waterproof Decorative Light for Advertising Letter Sign. (Color, 20)MSI Mystic Light provides you complete control of RGB lighting of your PC in one software, including your RGB motherboard / graphics card and PC case lighting. Logitech G pioneered RGB gaming gear and continues to innovate with LIGHTSYNC RGB technology, combining advanced hardware, firmware, and software for stunning lighting effects, improved battery life, and seamless customization through G HUB. It is the SMD compact version of the KY-016 RGB LED module. Compatible with Arduino, Raspberry Pi, ESP32 and other popular platforms.
