

Wire to the household distribution box

Overview

The Single Phase supply is 220Vac supply, which consists of 2 wires, one wire is Live and the other one is Neutral. These live and Neutral wires come from the distribution transformer to the energy meter and then directly connected to the main distribution board. In this video, we'll walk you through the process of wiring a home distribution box with a detailed connection diagram. Whether you're an electrician or a DIY enthusiast, this guide will help you understand the basics of home electrical distribution. It includes isolator, RCCB (Residual current circuit breaker) or RCD (Residual-current device) devices, protective fuses or MCB's (Miniature Circuit Breaker). A distribution board or distribution box is where the main power supply is distributed to multiple loads. All the electrical sub circuits are originated from a Distribution Board.
